

To whom it may concern,
I am deeply saddened and upset by the recent efforts of the NAB regarding petition 04-160. Setellite radio has been a life-saver for me - I regularly commute over 2 hours a day. I enjoy the variety of content provided by satellite, and I would not want that content limited by anyone but the paying customers. I get much value from the local traffic and weather reports, which are much more frequent and useful than those on my standard radio. This is a ridiculous attempt to stifle a technology that is clearly superior.

Regards,
Scott Stella
